SECTION I:

INTRODUCTION TO DOMAIN

Introduction

The Architectural, Planning and Design education system in India has witnessed rapid progress in recent years. Considering the wide diversities in the system there is a need to enhance its quality, standard and relevance so that the Architecture, Planning and Design graduates passing out from the University can meet the challenges of 21st century ahead of them.

There is a vast opportunity for the Architects, Planners and Designers with heavy demand in construction industry which is attracting national and international players. The growth pattern in construction and planning field over the last two decades has gone tremendously high with the development of new cities and towns because of which the demand of number of professionals to fulfill the need also increased. The matrix of demand and supply comprehend the need of formal education in the field of Architecture, Town Planning and Design.

At Amity University all three disciplines Architecture, Planning and Design studies run the umbrella of one Domain named as – **Faculty of architecture Planning and Interior Design (APID)** to not only facilitate improvement of the built environment but also enable students to develop skills that help them to turn out as excellent future designers. With specialization in different areas like-Architecture, Town Planning, Interior Design, Product Design courses prepare students to be involved in the constantly advancing built environment and impart effective society building skills. Architectural and Design education should emphasis not just in creating good architects, planners and designers but also on improving and enhancing the knowledge of social responsibility as professionals.

With many institutes already providing Bachelors and Master education, Amity has once again taking a leap forward and entered into the field of post graduate education. All the design programs has been established with an objective to educate, equip and empower the aspiring business leaders with relevant managerial skills, fostering values, creating social responsibility and global competence to meet the requirements of the changing and challenging business world.

A well designed Architecture, Planning and Design training courses suitably develop a talented the workforce that can be expected to be efficient future leaders and successful designers who are able to tackle complex situations and relationships with clients in any organization.

All the courses under the Domain APID degree must ensure to imbibe the following skills into future architecture and design professionals:

- i. **Design capabilities:** This deals with learning design methodologies for better productivity.
- ii. **Presentation skills:** Pertains to improving public speaking abilities and other interpersonal skills.
- iii. **Time Management :** It deals with an art of planning and controlling your time to effectively accomplish your goals
- iv. **Team Building Capabilities:** Learning new techniques to build a strong and successful team that works together towards achieving challenging goals.
- v. **Problem Solving Skills:** This deals with learning how to handle difficult situations by implementing strategies to manage employment performance problems.
- vi. **Professional Practices and Project Management:** activities that are used to set priorities focus energy and resources, strengthen operations, ensure that employment and other stakeholders are working toward common goals, establish agreement around intended outcomes/results, and assess and adjust the organization's direction in response to a changing environment.

The industry /profession needs are continuously changing while the global environment of education around the world is witnessing huge changes. The evolution of building design as a profession is a relatively new phenomenon demanding a different educational approach and pedagogy. As a professional discipline, design spans both the arts and the sciences. Students must have an understanding of the arts and humanities, as well as a basic technical understanding of structures and construction. Skills in communication, both visual and verbal, are essential. With the knowledge and skills the design stream is ultimately a process of critical thinking, analysis, and creative activity.

For Architecture the Council of Architecture was established in the early seventies as a statutory body with a view to oversee both the profession and the education of architects. With the expansion of the profession and proliferation of schools of architecture, a regulatory mechanism was necessary. The Council laid down certain norms of minimum facilities, procedures and courses that each school has to follow and instituted periodic inspection to ensure adherence. Though primarily mandated to oversee and regulate the profession, the Council was also given responsibility to regulate the education at undergraduate level.

Amity University is continuously striving for excellence in education. It is therefore, important to review and upgrade the curriculum of Programmes in line with the ever changing requirements of

industry /profession based on stakeholders' feedbacks. Amity University Offers Outcome Based Education (OBE) with Flexi Choice Based Credit System (CBCS) by benchmarking its programmes with best universities globally. UGC has formulated Choice Based Credit System (CBCS) for higher education in 2009, which have been further modified in 2014 to be adopted by the Universities /institution in the country.

SECTION II: INTRODUCTION OF OUTCOME ASSESSMENT PLAN

Introduction to Outcomes Assessment Plan

Outcomes assessment is a systematic, evaluative process that is implemented to secure learning experiences that are congruent with original goals and objectives; thereby providing a basis for the effectiveness and continuous quality improvement of the academic unit.

- 1. The annual **outcome assessment** process is more **qualitative** and focuses on improving teaching by **analyzing student learning outcomes**.
- 2. The programme **review process** is more **quantitative** and focuses on the programme/discipline as a whole, how effective it is, and that our students are learning.
- 3. To achieve the above, some aspect of each programmes goals and objectives needs to be assessed on an annual basis.
- 4. All programme and general education goals shall be evaluated annually

The outcome assessment plan includes:

- **1. Mission** The Mission is defined for the domain which flows down to the Institution level and finally to the programme level. The mission at the institution and programme level is aligned with the domain mission
- **2. Broad Based Goals:** The broad based are defined under the following categories:
- **2.1 Educational Goals:** The Educational Goals are defined at Domain, Institution and Programme level. The Educational Goals at the institution and programme level are aligned with the domain mission.
- **2.2 Operational Goals:** The Operational Goals are defined at Domain, Institution and Programme level. The Operational Goals at the institution and programme level are aligned with the domain mission.
- **3. Outcomes:** The Outcomes are defined under the following categories:
- **3.1 Operational Outcomes:** The operational outcomes are defined for the domain and assessed at the domain level
- **3.2 Educational Goals The** Learning outcomes are defined for each programme and each learning outcome is assessed to identify that the established learning objectives are achieved.
- **4. Mapping of PEOs and PLOs** The relationship of PEOs and PLOs are clearly indicated through the mapping of learning outcomes with the established Objective. Each outcome addresses some objective and achievement of outcome indicates the attainment of Objective
- **5. Assessment of Learning and Operational Outcomes** Each learning outcome is assessed by at least one direct and one indirect method. Similarly Operational outcomes are also assessed using the operational assessment tools. It also ensures that outcomes achieved are consistent with

the mission. The results of the annual assessments and other data are used to determine the effectiveness of the programme during the programme review process.

6.Programme Review: Through the review of our programmes we seek to demonstrate that:

- 1. Students are learning the knowledge, skills, and habits necessary to achieve the programme/discipline goals and objectives
- 2. The programme/discipline goals are derived from and support the college mission
- 3. The curriculum is coherent, current and consistent
- 4. The instruction is effective in enabling student
- 5. The resources are adequate for the production of student learning.
- 6. The academic support services are adequate to facilitate student learning.

SECTION III:

DOMAIN MISSION AND BROAD-BASED GOALS /OBJECTIVES Of

Faculty of Architecture, Planning and Design

3.1 Mission Statement

Domain Mission of Faculty of Architecture Planning and Interior Design

To provide education at all levels of Architecture, Planning and Design streams of modern times and in the futuristic and emerging frontier areas of knowledge, learning and research and to develop the overall personality of students by making them not only excellent professionals but also good individuals, with understanding and regard for human values, pride in their heritage and culture, a sense of right and wrong and yearning for perfection and imbibe attributes of courage of conviction and action

3.2 Broad-Based Educational Goals / Objectives of Faculty of Studies

Education	Educational Goals		
Students	Students shall able to		
1.	Define experiential knowledge of the application of Architectural Design/ Town Planning/ Design principles in a professional work setting.		
2.	Record and sustain effective individual and organizational performance by leveraging Research skills, Information and Technological competencies in the given architectural and design framework.		
3.	Interpret architectural and design theory with field practice across all functional areas in making effective decisions by understanding the relationship of construction industry to global environment.		
4.	Demonstrate effective communication skills that support and enhance effectiveness in profession.		
5.	Use soft skills to enable them to be a successful individual, team player, and demonstrate leadership qualities in their profession.		
6.	Relate himself/herself as part of emerging world community to contribute to its vales and practices as Global Citizen.		
7.	Build professional relationships and observe established boundaries or limits that are deemed appropriate under governing ethical standards.		
8.	Create the knowledge, skills and attitude to pursue higher education or gainful Employment in Industry or start their own ventures.		
9.	Develop habit of lifelong learning by engaging beyond classroom activities such as independent experiential learning, research, enquiry and networking.		

3.3 Broad-Based Operational Goals at Faculty Level

Оре	Operational Goals		
Fac	Faculty of Architecture Planning and Design will		
1	Create appropriate teaching learning resources, infrastructure and conducive environment for excellence in teaching, learning, research and professional development of students		
2	Provide Professional development programmes/opportunities to the faculty and staff to regularly upgrade their knowledge and skills and bring excellence in teaching, learning and research		
3	Demonstrate sensitivity to the diverse needs of students and accordingly develop facilities and services.		
4	Continuously strive to build strong industry interaction, alumni networks and empanelment of expertise from industry.		
5	Continually improve the quality of facilities, services, resources and processes with an aim to attain national and international accreditations and institutional ranking.		
6	Arrange all necessary support system for the students to facilitate campus recruitment, higher education or starting their own ventures.		
7	Act ethically to ensure transparency and good governance while discharging various responsibilities to its stakeholders and execution of policies and programs		
8	Create opportunities for international exposure for its students and faculty.		

SE	CTION IV:
INSTITUTION MISSION AND	BROAD-BASED GOALS /OBJECTIVES
Outcomes Assessment Plan = 2018-19 Fa	culty of Architecture Planning and Interior Design

4. INSTITUTION MISSION AND BROAD-BASED GOALS /OBJECTIVES

Name of the Institution: Amity School of Architecture and Planning

4.1 Mission Statement

Program Mission

The mission of the Institute is to achieve excellence in architectural and planning disciplines that, needs not only the skillful creation of forms, aesthetics and settlement planning but also inspirations from an in-depth bank of technical knowledge and practically know-how so as to achieve the leading edge of technology development and a sought after partner among the scientific and business communities. We intend to produce competent Architects and Planners who enter their careers in different sectors and contribute to the industry and society. The students are groomed as not only excellent professionals but also good individuals, with understanding and regard for human values, pride in their heritage and culture, a sense of right and wrong and yearning for perfection and imbibe attributes of courage of conviction and action.

4.2 Broad-Based Goals / Objectives at Amity School of Architecture and Planning Level

Educational Goals			
Students of	Students of ASAP shall be able to:		
1.	Define the basic concepts, theories, empirical findings and trends of Architecture and Urban Planning.		
2.	Understand the basic areas of research and their applications in building design and settlement planning.		
3.	Extend competency and ability to use computer and other technology for design development and other services for building design.		
4.	Demonstrate effective communication skills that support and enhance team leader and project management skills effectively.		
5.	Develop the deep sense of responsibility to perform his/her duties as an architect, planner ethically and honestly.		
6.	Compose the realistic ideas, knowledge and skills as needed by society.		
7.	Extrapolate the opportunities for international exposure in the field of architecture and planning.		
8.	Outline the importance of lifelong learning and personal flexibility to sustain as professional architect/planner.		

4.3 Broad-Based Operational Goals

Operatio	Operational Goals		
Amity Scl	Amity School of Architecture and Planning will be able to		
1	Create appropriate teaching learning resources for educational excellence in academic delivery and research.		
2	Provide an academically conducive environment for holistic development of students as an architect/planner.		
3	Demonstrate for innovation and research excellence for the intellectual growth of faculty.		
4	Build and cultivate the core values of the architecture profession and ethical conduct amongst team members.		
5	Encourage cultural diversity and a sense of social and environmental responsibility for the architecture profession.		
6	Provide ample opportunities for international exposure to faculty and students.		
7	Involve in continual improvement of processes and systems and aim to attain national and international accreditations and university rankings.		
8	Establish a strong industry interaction by way of alumni networks and empanelment of expertise from construction industry.		
9	Facilitate employment opportunities and also support students to start their own architecture/planning firms		
10	Recognize the varied talent and possibilities found in interdisciplinary design team in profession.		

Name of the Institution: Amity School of Design

4.4 Mission Statement

Mission of Institution

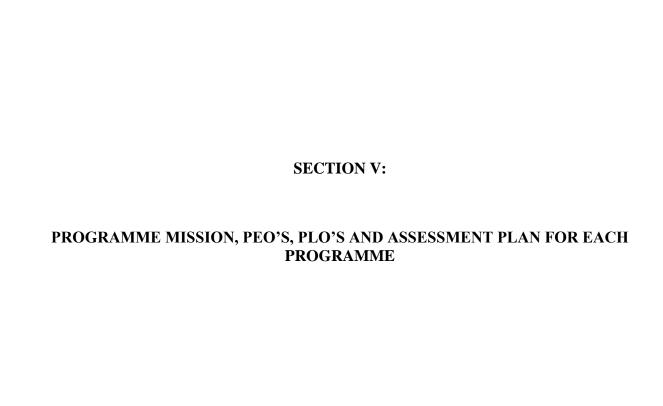

To provide education at all levels of Design streams of modern times and in the futuristic and emerging frontier areas of knowledge, learning and research and to develop the overall personality of students by making them not only excellent professionals but also good individuals, with understanding and regard for human values, pride in their heritage and culture, a sense of right and wrong and yearning for perfection and imbibe attributes of courage of conviction and action.

4.5 Broad-Based Goals / Objectives at Institution Level

Educ	Educational Goals		
Stude	Student shall be able to		
1	define comprehensive knowledge and understanding of design application		
2	interpret the design ideas related to opportunities in design industries		
3	relate information and use digital literacy in capturing information and developing innovative designs.		
4	classify innovative new designs ideas to satisfy the customer requirement.		
5	organize presentation skills proficiently, clearly and effectively while presenting design concepts.		
6	integrate creativity and enthusiasm while working in collaborative teams for successful implementation of design.		
7	evaluate opportunities and challenges that are needed for design at international level which offer them opportunities of global exposure.		
8	justify the highest standards of ethical behavior in their professional and personal life.		
9	Develop habit of lifelong learning by engaging outside classroom activities such as independent experiential learning, research, enquiry and networking.		

4.6 Broad-Based Operational Goals (Resources Required) At Institution level

Oper	Operational Goals			
ASD	ASD will be able to			
1	record appropriate teaching learning resources for educational excellence in Teaching/Academic Delivery and research.			
2	classify an academically conducive environment for holistic development of students.			
3	develop environment for innovation and research excellence for the intellectual growth of faculty and staff.			
4	establish culture core values of the university and ethical conduct amongst students, faculty and staff.			
5	illustrate ample opportunities for international exposure to faculty and students.			
6	apprise continually report the processes and systems to attain national and international accreditations and university rankings.			
7	perform a strong industry interaction by way of alumni networks and empanelment of expertise from industry.			
8	justify support system for employment opportunities of students and also support students to start their own ventures.			

5.0 Bachelors of Architecture (B.ARCH)

5.1 Mission Statement

Programme Mission

The mission of the programme is to achieve excellence in architectural discipline with emerging areas of knowledge and future research. We intend to develop overall personality of students and produce competent Architects, who enter their careers in different sectors and contribute to the industry and society. We aim to yield good professionals who possess regards for human values, pride in their heritage and culture and courage of conviction and action.

5.2 Programme Educational Objectives (PEOs)

Educational Goals			
Students s	Students shall be able to:		
1	Express their knowledge and expertise in the field of Architecture		
2	Identify areas of research and their applications in building design and settlement planning.		
3	Demonstrate advanced digital technology and technical skills for design development and other services for building design.		
4	Develop skills for effective communication by visual, verbal and written means		
5	Imbibe professional ethics to perform his/her duties as an architect for contribution as a global citizen		
6	Apply creative and futuristic thinking to ensure sustainable and socio- cultural diversity for the development of the society and adapt to the change in the built environment to ensure life-long learning		
7	Recognize leadership role of an architect in the built environment		
8	Translate their knowledge into skills to fetch employment in the industry and gain confidence to start their own venture		
9	Express their knowledge and expertise in the field of Architecture		
10	Identify areas of research and their applications in building design and settlement planning.		

5.3 Programme Operational Objectives

Operational Goals			
The Pr	The Programme of B.ARCH will		
1	Create excellence in architecture education, learning resources and infrastructure.		
2	Demonstrate environment for innovation, teaching skills and knowledge and research of faculty and staff excellence for the intellectual growth of students.		

3	Encourage students to demonstrate deep sense of responsibility for environment, culture and society
4	Build a strong bond among the industry-practicing architects and alumni of the school to support each other for future development of profession.
5	Create conducive learning environment preparing the student for higher learning in national & international universities.
6	Create employment opportunities and also support students to start their own architectural ventures.
7	Build the core value, culture and the ethics of the university within the students
8	Encourage students to perform best of their capacities and to provide national and international exposure for faculty, staff and students for self-development

5.4 Programme Learning Outcomes

Intend	ed Learning Outcomes						
Students	Students will be able to						
PLO 1	Comprehend the existing body of knowledge and will be able to meet the objectives by applying appropriate research methodology to arrive at logical conclusions						
PLO 2	Acquire knowledge and skills for creative output through research and design aligning with appropriate technology and management						
PLO 3	Illustrate with the help of appropriate media and digital technology to represent the design and construction processes						
PLO 4	Express effectively by acquiring visual, verbal and written communication skills						
PLO 5	Demonstrate ethical and responsible behavior in practice of architecture with commitment to the client, society and users as global citizen						
PLO 6	Develop creative and innovative solutions for sustainable built environment to address the diverse needs of self and society						
PLO 7	Integrate the leadership role of an architect in built environment to address the social, economic and environmental needs of the community						
PLO 8	Create employability, enterprise and entrepreneurship for self and others in the built environment and will be confident to start their own ventures						
PLO 9	Adapt to the culture of lifelong learning for continuous evolution to address the diverse needs of self and society						

5.5 Programme Operational Outcomes

Oper	Operational Outcomes							
The F	Programme of B.ARCH will be able to							
1	Identify the use of effective methodology and pedagogical tools for teaching, learning and development.							
2	Describe the relevant and contemporary curriculum to meet construction industry requirements and benchmarked on global standards for intellectual growth of faculty, staff and students.							
3	Estimate potential possibilities for a sustainable and environmental friendly growth in construction industry.							
4	Determine employment opportunities of all the students and will also support students to start their own architectural firms.							
5	Examine the scholarly and professional activities and will fetch digital and technical knowledge in order to enhance competencies and to contribute to the existing body of knowledge.							
6	Generate employment opportunities and also support students to start their own architectural.							
7	Assess the need to perform duties ethically and practice the highest standards to serve the society.							
8	Justify a habit of continuous lifelong learning and personal development during the work to support their career aspirations in future.							

5.6 Mapping of Intended Programme Learning Outcomes to Broad-Based Programme Educational Objectives (PEOs)

The broad-based student learning goals identified in Section I above encompass the intended student learning outcomes as articulated in this section, and are general composites or summaries of these outcomes. These relationships are summarized in the outcomes-to-goals mapping below (Note: $\sqrt{\text{in a}}$ given cell of the table indicates the intended learning outcome in that row is associated with the learning goal in that column.):

PLOs (PEOs)	PEO 1	PEO 2	PEO 3	PEO 4	PEO 5	PEO 6	PEO 7	PEO 8	PEO 9	PEO 10
Learning Outcome 1	V	\checkmark						$\sqrt{}$		
Learning Outcome 2	V	$\sqrt{}$			V					
Learning Outcome 3			√							
Learning Outcome 4	√		V	V				$\sqrt{}$		
Learning Outcome 5				V	V					
Learning Outcome 6						V	$\sqrt{}$			

PLOs (PEOs)	PEO 1	PEO 2	PEO 3	PEO 4	PEO 5	PEO 6	PEO 7	PEO 8	PEO 9	PEO 10
Learning Outcome 7				$\sqrt{}$						
Learning Outcome 8			$\sqrt{}$					$\sqrt{}$		
Learning Outcome 9	\checkmark	$\sqrt{}$	$\sqrt{}$	$\sqrt{}$					$\sqrt{}$	$\sqrt{}$
Learning Outcome 10		√						$\sqrt{}$	$\sqrt{}$	$\sqrt{}$

5.7 Student Learning Assessment for Bachelors of Architecture

S.N o	Attributes	Programme Education Objective PEO	Programme Learning Outcome PLO	Direct	Tool for Direct Assess ment	Target Perform ance	Indirect	Tool_ for Indirec t Assess ment	Target Performa nce
1	Knowledge and Expertise	Student shall be able to define their knowledge and expertise in Architectural field.	Student will define knowledge and understanding representing appropriate breadth and depth of the architecture using its concepts, languages and major theories appropriately.	Compreh ensive Exam/ Viva	UG/PL O/D/C E Frame work	80% students shall pass the exam.	Alumni Survey Student Exit Survey.	UG PLO/I D/Exit Survey	80% student's response range between 4-5 on the Likert Scale in the Studen Exit Survey.
2	Research and Enquiry	Student shall be able to classify areas of research and their applications in building design and settlement planning.	Student will describe the basic characteristics of the architecture discipline as a science, and will be able to explain different research methods and to evaluate the results derived	Dissertati on and Thesis	UG/PL O/D/ Dissert ation and Thesis	80% students will undertak e and complete the dissertati on, Thesis	Feedback of Industry Internship Guide Alumni Survey	UG PLO/I D/Exit Survey	The Industry Internship Guide rate the students between 4-5 range on the Likert Scale in the feedback.

6.0 Bachelors of Planning (B.PLAN)

6.1 Mission Statement

Programme Mission

The mission of the programme is to achieve excellence in planning discipline related to build urban environment with due regards to the historical context and emerging futuristic technology to cater a better sustainable living condition through knowledge sharing, learning and research. We intend to develop overall personality of students and produce competent Planners, who enter their careers in different sectors and contribute to the industry and society. We aim to yield good professionals who possess regards for human values, pride in their heritage and culture and courage of conviction and action.

6.2 Programme Educational Objectives (PEOs)

Educatio	nal Goals
Students sl	nall be able to:
1	Define their knowledge and proficiency in urban planning.
2	Classify areas of research and their applications including primary and secondary data collection, their analysis and trends identification.
3	Illustrate advanced digital technology and the ability to use computers for many planning purposes.
4	Summarize the local, regional and global problems so as to provide the best possible planning interventions for effective decisions globally.
5	Demonstrate a range of communication methods and media to present design proposals, clearly and effectively.
6	Develop insight into their own conduct and others' behavior so as to adopt the best environment to work in teams as well as individually.
7	Characterize the professional ethics to perform his/her duties as a planner for contribution as a global citizen.
8	Recognize the diversity of settlements, human behavior and specific needs of the society to provided relevant planning solutions.
9	Create lifelong learning and personal flexibility to sustain as professional Planner.
10	Justify employability, enterprise & entrepreneurship in industry and encourage to start their own endeavor.

6.3 Programm.e Operational Objectives

Operat	Operational Goals							
The Pro	The Programme of B.PLAN will							
1	Create excellence in planning education, learning resources and infrastructure.							
2	Demonstrate environment for innovation, teaching skills and knowledge and research of faculty and staff excellence for the intellectual growth of students.							
3	Encourage students to demonstrate deep sense of responsibility for environment, culture and society							
4	Build a strong bond among the industry-practicing planners and alumni of the school to support each other for future development of profession.							
5	Create conducive learning environment preparing the student for higher learning in national & international universities.							
6	Create employment opportunities and also support students to start their own venture.							
7	Build the core value, culture and the ethics of the university within the students							
8	Encourage students to perform best of their capacities and to provide national and international exposure for faculty, staff and students for self-development							

6.4 Programme Learning Outcomes

Intend	Intended Learning Outcomes								
Students	will be able to								
PLO 1	PLO 1 Define knowledge and understanding representing appropriate breadth and depth of the Planning using its concepts, languages and major theories appropriately.								
PLO 2	Describe the basic characteristics of the urban planning discipline as a science, and will be able to explain different research methods and to evaluate the results derived from research.								
PLO 3	Appraise the use of appropriate representational media including freehand drawings and digital technology to convey essential formal elements at each level of design process.								
PLO 4	Demonstrate planning characteristics as the professional experts and solve global problems.								
PLO 5	Develop effective communication, teamwork skills and project management skills.								
PLO 6	Report behavioral skills demonstrating planning skills and leadership quality.								
PLO 7	Examine the necessity of the ethical behavior in all aspects of the planning practice and the responsibility of the urban planner to elicit, understand, and resolve the needs of the client, owner and user.								
PLO 8	Integrate the need of a planner to provide leadership in building design and construction process and issue of growth, development, and aesthetics in their communities.								

PLO 9	Create employability, enterprise & entrepreneurship for themselves and others in industry and will be confident to start their own venture.
PLO 10	Appraise an understanding of the importance of lifelong learning and personal flexibility to sustain as an urban planner personally and professionally.

6.5 Programme Operational Outcomes

Oper	Operational Outcomes							
The I	Programme of B.PLAN will be able to							
1	Identify the use of effective methodology and pedagogical tools for teaching, learning and development.							
2	Describe the relevant and contemporary curriculum to meet construction industry requirements and benchmarked on global standards for intellectual growth of faculty, staff and students.							
3	Estimate potential possibilities for a sustainable and environmental friendly growth in construction industry.							
4	Determine employment opportunities of all the students and will also support students to start their own Planning firms.							
5	Examine the scholarly and professional activities and will fetch digital and technical knowledge in order to enhance competencies and to contribute to the existing body of knowledge.							
6	Generate employment opportunities and also support students to start their own Venture							
7	Assess the need to perform duties ethically and practice the highest standards to serve the society.							
8	Justify a habit of continuous lifelong learning and personal development during the work to support their career aspirations in future.							

6.6 Mapping of Intended Programme Learning Outcomes to Broad-Based Programme Educational Objectives (PEOs)

The broad-based student learning goals identified in Section I above encompass the intended student learning outcomes as articulated in this section, and are general composites or summaries of these outcomes. These relationships are summarized in the outcomes-to-goals mapping below:

PLOs (PEOs)	PEO 1	PEO 2	PEO 3	PEO 4	PEO 5	PEO 6	PEO 7	PEO 8	PEO 9	PEO 10
Learning Outcome 1	$\sqrt{}$	$\sqrt{}$								
Learning Outcome 2	$\sqrt{}$	$\sqrt{}$			$\sqrt{}$					
Learning Outcome 3			$\sqrt{}$		$\sqrt{}$					
Learning Outcome 4	√		V	V				V		
Learning Outcome 5				$\sqrt{}$	$\sqrt{}$					
Learning Outcome 6							√			
Learning Outcome 7				$\sqrt{}$			√			
Learning Outcome 8			$\sqrt{}$				V	V		
Learning Outcome 9	$\sqrt{}$	$\sqrt{}$	$\sqrt{}$	$\sqrt{}$					$\sqrt{}$	$\sqrt{}$
Learning Outcome 10								V	$\sqrt{}$

7.0 Bachelors of Interior Design (BID)

7.1 Mission Statement

Programme Mission

The mission of the Bachelor Interior Design Program (BID) is to provide education at all levels of interior Design of modern times and in the futuristic and emerging frontier areas of knowledge, learning and research and to develop the overall personality of students by making them not only excellent professionals but also good individuals, with understanding and regard for human values, pride in their heritage and culture, a sense of right and wrong and yearning for perfection and imbibe attributes of courage of conviction and action.

Programme Description

Four years full time of BID (UG) program has been designed with all basic knowledge of Interior Designing. The program details the relationship between Architecture & Interior Design as an integral part of building development. The focus is to develop professional skills in the field of Interior Design focusing on principles and elements of design, model making techniques, application of services, construction details of elements of design, furniture design skills, graphical representation, history of design to help understand the origin of Architecture & Interiors, Cost effective commercial & residential spaces, the, sustainable and landscape enriched interiors to create the built environment using latest software, understanding of codes, conduct and ethics for corporate working.

7.2 Programme Educational Objectives (PEOs)

Students	Students shall able to					
1.	Identify & describe comprehensive knowledge and understanding of Interior Design methods and procedures for professional work setting.					
2.	Record professional traits in Interior Design field at individual and organizational performance level influencing by research skills and related enquiry methods.					
3.	Discuss the required digital medium to express drawing language in projects adapting latest IT technologies and software for effective innovative skills in Interior Design profession.					
4.	Summarize design concept and philosophy with field practice for all functions related to Interior Design for taking effective decisions at global level.					
5.	Develop effective communication skills that reinforce and enrich the efficacy of professional trait in dealing with colleagues, clients and end users.					
6.	Establish sensitive behavioral skills to enable them to be successful individual, a team leader and demonstrate management leadership qualities in their professional field.					
7.	Compare himself/herself in the creative field of Interior Design profession with respect to world scenario for professional contribution as Global Citizen.					

8.	Recognize the value of socio-cultural diversity at international level and project the same in their designs for worldwide acceptance.
9.	Create eagerness to gain lifelong learning in the ever changing world order beyond classroom activities through research and development activities.
10.	Development in their chosen profession and/or progress toward an advanced degree

7.3 Programme Operational Objectives

RII	program will be able to
DIL	program will be uble to
1	Organize suitable proper learning resources, infrastructure and working environment for students to gain knowledge of Interior Design profession through research and development.
2	Generate opportunities for faculty and staff members regularly to enhance their professional and teaching skills & knowledge through faculty/staff development programs and research activities.
3	Reinforce empathy towards the distinct needs of the students of Interior Design profession and provide facilities and services accordingly concerning environmental aspects also.
4	Formulate and structure the strong link with industry by inviting experts regularly for student interaction. Formulate alumni network for a continuous feedback pertaining to academic improvement on the basis of industry needs.
5	Modify and improve the facilities, services, resources and processes regularly with an aim to attain national and international accreditations and institutional ranking.
6	Develop and organize required assistance for the students to facilitate them with the campus recruitment, higher education or starting their own ventures in Interior Design profession.
7	Act ethically to ensure transparency and good governance while discharging various responsibilities to its stakeholders and execution of policies and programs
8	Create ample opportunities for national and international exposure for its students and faculty members in view of self – development.

7.4 Programme Learning Outcomes

	Students of BID will be able to
1.	Define the major objectives of Interior Design and apply the knowledge of elements of design, graphics construction and services for the solution of complex interior design problems.
2	Provide research literature based information and analysis of complex design problem reaching to substantial conclusion and application to Interior Design projects.
3	Build the skill to use various digital mediums to communicate the creative ideas in a planned and timely manner and apply advanced design software to provide appropriate, accurate and speedy design solutions.
4	Demonstrate characteristics of being expert in professional field helping them to take decisions effectively.

5	Develop efficient communication skills for building quality professional relationship and
	develop successful relations in all levels of society.
6	Illustrate proficient behavioral skills demonstrating successful individual and team leader
	with leadership qualities.
7	Relate effectively to the professionals and great masters of the world for professional contribution and mark himself/herself as Global Citizen.
8	Integrate themselves as professionals contributing as Interior Designers in multideciplinary design firms.
9	Support and acquire knowledge and skills for own practice and industry oriented jobs independently.
10	Adapt gainfully the habit of acquiring lifelong learnings for self-development and progression.

7.5 Programme Operational Outcomes

BID program will be able to						
POO 1	record efficient learning resources in terms of infrastructure and academic environment for students focusing on research and innovation.					
POO 2	Classify robust association with the industry by inviting experts, alumni and sending students to the industry for internship.					
POO 3	develop research and innovation based design solutions from case studies, live projects and design competitions.					
POO 4	Establish faculty / staff development programs which would further help faculty and staff to enhance their professional skills.					
POO 5	Illustrate analytical skills for space design and optimization, utilization, including fundamentals and application of design tools.					
POO 6	apprise international exposure through Conferences, Seminars, Symposiums, Talks, Guest Lectures and visits.					
POO 7	perform computational and software skills and usage of latest techniques and software.					

POO 8	Justify learnings as future Entrepreneurs and professionals in Design field
POO 9	Decide the importance of disctinct needs and services required for Interior Design students taking environmental concern in focus.

7.6 Mapping of Intended Programme Learning Outcomes to Broad-Based Programme Educational Objectives (PEOs)

The broad-based student learning goals identified in Section I above encompass the intended student learning outcomes as articulated in this section, and are general composites or summaries of these outcomes. 8.0 Bachelors of Design – Product Design (B.Des-PD)

8.1 Mission Statement

Programme Mission

The mission of the Bachelor Interior Design Program (B.DES) To provide education at all levels of Product Design of modern times and in the futuristic and emerging frontier areas of knowledge, learning and research and to develop the overall personality of students by making them not only excellent professionals but also good individuals, with understanding and regard for human values, pride in their heritage and culture, a sense of right and wrong and yearning for perfection and imbibe

attributes of courage of conviction and action

Programme Description

Programme Description: The Bachelor of Design (B.DES) in Product Design cultivates the technical and critical skills you need to design products that enhance human abilities and relationships. In this major, you address contemporary realities including sustainability and technological change while exploring materials, fabrication, aesthetics, and social engagement in both local and global contexts. Graduates may undertake professional work in product and exhibition design, retail products, lifestyle product design, lighting design, computer-aided design and design management with orientation for research methodologies, innovations and applications. It provides motivation for students for working in corporate sector as well as to be an entrepreneur.

8.2 Programme Educational Objectives (PEOs)

Students	Students shall able to						
1.	Describe knowledge and understanding of Product Design methods and procedures for professional work setting.						
2.	Record professional traits in Product Design field at individual and organizational performance level and apply research skills and related enquiry methods.						
3.	Discuss the required digital medium to express graphic language with latest IT technologies and software for effective idea generation in Product Design profession.						
4.	Summarize design concept and philosophy with field practice for all functions related to Product Design for taking effective decisions at global level.						
5.	Develop effective communication skills for presenting concepts, ideas and philosophy that reinforce and enrich the efficacy of professional trait in dealing with colleagues, clients and end users.						
6.	Establish sensitive behavioral skills to enable them to be successful individual, a team leader and demonstrate management leadership qualities in their professional field.						
7.	Compare himself/herself in the creative field of Product Design profession with respect to world scenario for professional contribution as Global Citizen.						
8.	Recognize the value of socio-cultural diversity at international level and project the same in their designs for worldwide acceptance.						
9.	Generate and possess the knowledge and skills required for self-employment or securing job in industry with attributes of entrepreneurship.						
10.	Create eagerness to gain lifelong learning in the ever changing world order beyond classroom activities through research and development activities.						

8.3 Programme Operational Objectives

B.D	ES program will be able to
1	Organize suitable proper learning resources, infrastructure and working environment for students to gain knowledge of Product Design profession through research and development.
2	Generate opportunities for faculty and staff members regularly to enhance their professional and teaching skills & knowledge through faculty/staff development programs and research activities.
3	Reinforce empathy towards the distinct needs of the students of Design profession and provide facilities and services accordingly concerning environmental aspects also.
4	Formulate and structure the strong link with industry by inviting experts regularly for student interaction. Formulate alumni network for a continuous feedback pertaining to academic improvement on the basis of industry needs.
5	Modify and improve the facilities, services, resources and processes regularly with an aim to attain national and international accreditations and institutional ranking.
6	Develop and organize required assistance for the students to facilitate them with the campus recruitment, higher education or starting their own ventures in Industrial Design profession.
7	Act ethically to ensure transparency and good governance while discharging various responsibilities to its stakeholders and execution of policies and programs
8	Create ample opportunities for national and international exposure for its students and faculty members in view of self – development.

8.4 Programme Learning Outcomes

Stude	nts of B.DES will be able to
1	Define the major objectives of Design and apply the knowledge of elements of design, graphics construction and services for the solution of complex product design problems.
2	Provide research literature based information and analysis of complex design problem reaching to substantial conclusion and application to Product Design projects.
3	Build the skill to use various digital mediums to communicate the creative ideas in a planned and timely manner and apply advanced design software to provide appropriate, accurate and speedy design solutions.
4	Demonstrate characteristics of being expert in professional field helping them to take decisions effectively.
5	Use efficient communication skills for building quality professional relationship and develop successful relations in all levels of society.
6	Illustrate proficient behavioral skills demonstrating successful individual and team leader with leadership qualities.
7	Relate effectively to the professionals and great masters of the world for professional contribution and mark himself/herself as Global Citizen.
8	Integrate themselves as professionals contributing as Designers as Global Citizens.
9	Support and acquire knowledge and skills for own practice and industry oriented jobs independently.
10	Adapt gainfully the habit of acquiring lifelong learnings for self-development and progression.

8.5 Programme Operational Outcomes

B.Des.(P	B.Des.(PD) program will be able to					
POO 1	record efficient learning resources in terms of infrastructure and academic environment for students focusing on research and innovation.					
POO 2	Classify robust association with the industry by inviting experts, alumni and sending students to the industry for internship.					
POO 3	develop research and innovation based design solutions from case studies, live projects and design competitions.					
POO 4	Establish faculty / staff development programs which would further help faculty and staff to enhance their professional skills.					
POO 5	Illustrate analytical skills for space design and optimization, utilization, including fundamentals and application of design tools.					
POO 6	apprise international exposure through Conferences, Seminars, Symposiums, Talks, Guest Lectures and visits.					
POO 7	perform computational and software skills and usage of latest techniques and software.

9.0 Masters of Architecture (M.ARCH)

9.1 Mission Statement

Programme Mission

The mission of the programme is to achieve excellence in architectural discipline with emerging areas of knowledge and future research. We intend to develop overall personality of students and produce competent Architects, who enter their careers in different sectors and contribute to the industry and society. We aim to yield good professionals who possess regards for human values, pride in their heritage and culture and courage of conviction and action.

9.2 Programme Educational Objectives (PEOs)

Educational Goals

Students sl	hall be able to:
1	Define their advanced knowledge and expertise in Architectural field.
2	Classify areas of research and their applications in building design and settlement planning.
3	Illustrate advanced digital technology and technical skills for design development and other services for building design.
4	Summarize design, concept and philosophy in architectural field for effective decisions globally
5	Demonstrate effective communication and teamwork that support and enhance project management skills effectively.
6	Develop behavioural skills for enabling the individual to be successful team leader and a professional.
7	Characterize the professional ethics to perform his/her duties as an architect for contribution as a global citizen.
8	Recognize creative and futuristic thinking to ensure sustainable and socio- cultural diversity for the development of the society.
9	Create lifelong learning and personal flexibility to sustain as professional architect.
10	Justify employability, enterprise & entrepreneurship in industry and encourage to start their own venture.

9.3 Programme Operational Objectives

7.5 Trogramme Operational Objectives						
Operational Goals						
The Pro	ogramme of M.ARCH will					
1	Create excellence in architecture education, learning resources and infrastructure.					
2	Demonstrate environment for innovation, teaching skills and knowledge and research of faculty and staff excellence for the intellectual growth of students.					
3	Encourage students to demonstrate deep sense of responsibility for environment, culture and society					
4	Build a strong bond among the industry-practicing architects and alumni of the school to support each other for future development of profession.					
5	Create conducive learning environment preparing the student for higher learning in national & international universities.					
6	Create employment opportunities and also support students to start their own architectural venture.					
7	Build the core value, culture and the ethics of the university within the students					
8	Encourage students to perform best of their capacities and to provide national and international exposure for faculty, staff and students for self-development					

9.4 Programme Learning Outcomes

Intende	Intended Learning Outcomes					
Students v	will be able to					
PLO 1	Define knowledge and understanding representing appropriate breadth and depth of the architecture using its concepts, languages and major theories appropriately.					
PLO 2	Describe the basic characteristics of the architecture discipline as a science, and will be able to explain different research methods and to evaluate the results derived from research.					
PLO 3	Appraise the use of appropriate representational media including freehand drawings and digital technology to convey essential formal elements at each level of design process.					
PLO 4	Demonstrate architectural characteristics as the professional experts and solve global problems.					
PLO 5	Develop effective communication, teamwork skills and project management skills.					
PLO 6	Report behavioral skills demonstrating architectural skills and leadership quality.					
PLO 7	Examine the necessity of the ethical behavior in all aspects of the architecture practice and the responsibility of the architect to elicit, understand, and resolve the needs of the client, owner and user as global citizen.					
PLO 8	Integrate the need of an architect to provide leadership in building design and construction process and issue of growth, development, and aesthetics in their communities.					
PLO 9	Create employability, enterprise & entrepreneurship for themselves and others in industry and will be confident to start their own venture.					
PLO 10	Appraise an understanding of the importance of lifelong learning and personal flexibility to sustain as an architect personally and professionally.					

9.5 Programme Operational Outcomes

9.5	Programme Operational Outcomes							
Oper	Operational Outcomes							
The P	Programme of M.ARCH will be able to							
1	Identify the use of effective methodology and pedagogical tools for teaching, learning and development.							
2	Describe the relevant and contemporary curriculum to meet construction industry requirements for intellectual growth of faculty, staff and students on global standards.							
3	Estimate potential possibilities for a sustainable and environmental friendly growth in construction industry.							
4	Determine employment opportunities of all the students and will also support students to start their own architectural firms.							
5	Examine the scholarly and professional activities and will fetch digital and technical knowledge in order to enhance competencies and to contribute to the existing body of knowledge.							
6	Generate employment opportunities and also support students to start their own architectural ventures.							
7	Assess the need to perform duties ethically and practice the highest standards to serve the society.							
8	Justify a habit of continuous lifelong learning and personal development during the work to support their career aspirations in future.							

9.6 Mapping of Intended Programme Learning Outcomes to Broad-Based Programme Educational Objectives (PEOs)

The broad-based student learning goals identified in Section I above encompass the intended student learning outcomes as articulated in this section, and are general composites or summaries of these outcomes. These relationships are summarized in the outcomes-to-goals mapping below (Note: $\sqrt{\text{in a}}$ given cell of the table indicates the intended learning outcome in that row is associated with the learning goal in that column.):

PLOs (PEOs)	PEO 1	PEO 2	PEO 3	PEO 4	PEO 5	PEO 6	PEO 7	PEO 8	PEO 9	PEO 10

10.0 Masters of interior Design (MID)

10.1 Mission Statement

Programme Mission

The **mission** of the Masters in Interior Design Program To provide advanced education at all levels of interior Design of modern times and in the futuristic and emerging frontier areas of knowledge, learning and research and to develop the overall personality of students by making them not only excellent professionals but also good individuals, with understanding and regard for human values, pride in their heritage and culture, a sense of right and wrong and yearning for perfection and imbibe attributes of courage of conviction and action.

Programme Description

The Master of Design (Interior Design) is 2 yrs programme designed for individuals who apply advanced knowledge of interior design for professional practice or scholarship and as a pathway for further learning. The course has a flexible structure with specific research, discipline focused and studio-based practice units. The course provides advanced skills to professionals who develop innovative 3D spaces and includes public environments, commercial spaces and domestic environments. Design projects typically cover the construction of space, materials, lighting, and sound environments. Graduates may undertake professional work in interior and exhibition design, hotel/retail design, theatre design, museum design, computer-aided design and design management with orientation for research methodologies, innovations and applications. It provides motivation for students for working in corporate sector.

10.2 Programme Educational Objectives (PEOs)

Studen	Students shall able to								
1.	Identify & describe comprehensive advance knowledge and understanding of Interior Design methods and procedures for professional work setting.								
2.	Record professional traits in Interior Design field at individual and organizational performance level influencing by advance research skills levels and related enquiry methods.								
3.	Discuss the required digital medium to express drawing language in projects adapting latest IT technologies and software for effective innovative skills in Interior Design profession.								
4.	Summarize design concept and philosophy with field practice for all functions related to Interior Design for taking effective decisions at global level.								

	Develop effective communication skills that reinforce and enrich the efficacy of
5.	professional trait
	in dealing with colleagues, clients and end users.
6.	Establish sensitive behavioral skills to enable them to be successful individual, a team
0.	leader and demonstrate management leadership qualities in their professional field.
7.	Compare himself/herself in the creative field of Interior Design profession with respect to world scenario for professional contribution as Global Citizen.
8.	Compare himself/herself in the creative field of Interior Design profession with respect to world scenario for professional contribution as Global Citizen.
9.	Generate and possess the knowledge and skills required for self-employment or securing job in industry with attributes of entrepreneurship.
10.	Create eagerness to gain lifelong learning in the ever changing world order beyond classroom activities through research and development activities.

10.3 Programme Operational Objectives

MI	D program will be able to
1	Organize suitable proper learning resources, infrastructure and working environment for students to gain knowledge of Interior Design profession through research and development.
2	Generate opportunities for faculty and staff members regularly to enhance their professional and teaching skills & knowledge through faculty/staff development programs and research activities.
3	Reinforce empathy towards the distinct needs of the students of Interior Design profession and provide facilities and services accordingly concerning environmental aspects also.
4	Formulate and structure the strong link with industry by inviting experts regularly for student interaction. Formulate alumni network for a continuous feedback pertaining to academic improvement on the basis of industry needs.
5	Modify and improve the facilities, services, resources and processes regularly with an aim to attain national and international accreditations and institutional ranking.
6	Develop and organize required assistance for the students to facilitate them with the campus recruitment, higher education or starting their own ventures in Interior Design profession.
7	Act ethically to ensure transparency and good governance while discharging various responsibilities to its stakeholders and execution of policies and programs
8	Create ample opportunities for national and international exposure for its students and faculty members in view of self – development.

10.4 Programme Learning Outcomes

	Students of MID will be able to
2.	Define the major objectives of Interior Design and apply the knowledge of elements of design, graphics construction and services for the solution of complex interior design problems.
2	Provide research literature based information and analysis of complex design problem reaching to substantial conclusion and application to Interior Design projects.
3	Build the skill to use various digital mediums to communicate the creative ideas in a planned and timely manner and apply advanced design software to provide appropriate, accurate and speedy design solutions.
4	Demonstrate characteristics of being expert in professional field helping them to take decisions effectively.
5	Use efficient communication skills for building quality professional relationship and develop successful relations in all levels of society.
6	Illustrate proficient behavioral skills demonstrating successful individual and team leader with leadership qualities.
7	Relate effectively to the professionals and great masters of the world for professional contribution and mark himself/herself as Global Citizen.
8	Integrate themselves as professionals contributing as Interior Designers as Global Citizens.
9	Support and acquire knowledge and skills for own practice and industry oriented jobs independently.
10	Adapt gainfully the habit of acquiring lifelong learnings for self-development and progression.

10.5 Programme Operational Outcomes

MID pro	MID program will be able to								
POO 1	record efficient learning resources in terms of infrastructure and academic environment for students focusing on research and innovation.								
POO 2	Classify robust association with the industry by inviting experts, alumni and sending								

	students to the industry for internship.
POO 3	develop research and innovation based design solutions from case studies, live projects and design competitions.
POO 4	Establish faculty / staff development programs which would further help faculty and staff to enhance their professional skills.
POO 5	Illustrate analytical skills for space design and optimization, utilization, including fundamentals and application of design tools.
POO 6	apprise international exposure through Conferences, Seminars, Symposiums, Talks, Guest Lectures and visits.
POO 7	perform computational and software skills and usage of latest techniques and software.
POO 8	Justify learnings as future Entrepreneurs and professionals in Design field
POO 9	Decide the importance of disctinct needs and services required for Interior Design students taking environmental concern in focus.

10.6 Mapping of Intended Programme Learning Outcomes to Broad-Based Programme Educational Objectives (PEOs)

The broad-based student learning goals identified in Section I above encompass the intended student learning outcomes as articulated in this section, and are general composites or summaries of these outcomes. These relationships are summarized in the outcomes-to-goals mapping below (Note: $\sqrt{\text{in a}}$ given cell of the table indicates the intended learning outcome in that row is associated with the learning goal in that column.):

11.0 Dual degree programme – BID- MID (DUAL)

11.1 Mission Statement

Programme Mission

The mission of the (BID -MID -DUAL) programme is to provide education at all levels of interior Design of modern times and in the futuristic and emerging frontier areas of knowledge, learning and research and to develop the overall personality of students by making them not only excellent professionals but also good individuals, with understanding and regard for human values, pride in their heritage and culture, a sense of right and wrong and yearning for perfection and imbibe attributes of courage of conviction and action.

Programme Description

Programme Description BID- MID (Dual) (Interior Design) is 5yrs programme designed for individuals who apply advanced knowledge of interior design for professional practice or scholarship and as a pathway for further learning. The course has a flexible structure with specific research, discipline focused and studio-based practice units. The course provides advanced skills to professionals who develop innovative 3D spaces and includes public environments, commercial spaces and domestic environments. Design projects typically cover the construction of space, materials, lighting, and sound environments. Post Graduates may undertake professional work in interior and exhibition design, hotel/retail design, theatre design, museum design, computer-aided design and design management with orientation for research methodologies, innovations and applications. It provides motivation for students for working in corporate sector.

11.2 Programme Educational Objectives (PEOs)

Students	Students shall able to							
1	Identify & describe comprehensive knowledge and understanding of Interior Design methods and procedures for professional work setting.							
2	Record professional traits in Interior Design field at individual and organizational performance level influencing by research skills and related enquiry methods.							
3	Discuss the required digital medium to express drawing language in projects adapting latest IT technologies and software for effective innovative skills in Interior Design profession.							
4	Summarize design concept and philosophy with field practice for all functions related to Interior Design for taking effective decisions at global level.							
5	Develop effective communication skills that reinforce and enrich the efficacy of professional trait							

	in dealing with colleagues, clients and end users.
6	Establish sensitive behavioral skills to enable them to be successful individual, a team leader and demonstrate management leadership qualities in their professional field.
7	Compare himself/herself in the creative field of Interior Design profession with respect to world scenario for professional contribution as Global Citizen.
8	Compare himself/herself in the creative field of Interior Design profession with respect to world scenario for professional contribution as Global Citizen.
9	Generate and possess the knowledge and skills required for self-employment or securing job in industry with attributes of entrepreneurship.
10	Create eagerness to gain lifelong learning in the ever changing world order beyond classroom activities through research and development activities.

11.3 Programme Operational Objectives

BII	O- MID (Dual) program will be able to
1	Organize suitable proper learning resources, infrastructure and working environment for students to gain knowledge of Interior Design profession through research and development.
2	Generate opportunities for faculty and staff members regularly to enhance their professional and teaching skills & knowledge through faculty/staff development programs and research activities.
3	Reinforce empathy towards the distinct needs of the students of Interior Design profession and provide facilities and services accordingly concerning environmental aspects also.
4	Formulate and structure the strong link with industry by inviting experts regularly for student interaction. Formulate alumni network for a continuous feedback pertaining to academic improvement on the basis of industry needs.
5	Modify and improve the facilities, services, resources and processes regularly with an aim to attain national and international accreditations and institutional ranking.
6	Develop and organize required assistance for the students to facilitate them with the campus recruitment, higher education or starting their own ventures in Interior Design profession.
7	Act ethically to ensure transparency and good governance while discharging various responsibilities to its stakeholders and execution of policies and programs
8	Create ample opportunities for national and international exposure for its students and faculty members in view of self – development.

11.4 Programme Learning Outcomes

Students of BID- MID (Dual) will be able to

1	Define the major objectives of Interior Design and apply the knowledge of elements of
	design, graphics construction and services for the solution of complex interior design
	problems.
2	Provide research literature based information and analysis of complex design problem
	reaching to substantial conclusion and application to Interior Design projects.
3	Build the skill to use various digital mediums to communicate the creative ideas in a planned
	and timely manner and apply advanced design software to provide appropriate, accurate and
	speedy design solutions.
4	Demonstrate characteristics of being expert in professional field helping them to take
	decisions effectively.
5	Use efficient communication skills for building quality professional relationship and develop
	successful relations in all levels of society.
6	Illustrate proficient behavioral skills demonstrating successful individual and team leader
	with leadership qualities.
7	Relate effectively to the professionals and great masters of the world for professional
	contribution and mark himself/herself as Global Citizen.
0	Table 1 Colored Charles
8	Integrate themselves as professionals contributing as Interior Designers as Global Citizens.
9	Support and acquire knowledge and skills for own practice and industry oriented jobs
1.0	independently.
10	Adapt gainfully the habit of acquiring lifelong learnings for self-development and
	progression.

11.5 Programme Operational Outcomes

BID- MI	BID- MID (Dual) program will be able to							
POO 1	record efficient learning resources in terms of infrastructure and academic environment for students focusing on research and innovation.							
POO 2	Classify robust association with the industry by inviting experts, alumni and sending students to the industry for internship.							
POO 3	develop research and innovation based design solutions from case studies, live projects and design competitions.							
POO 4	Establish faculty / staff development programs which would further help faculty and staff to enhance their professional skills.							

POO 5	Illustrate analytical skills for space design and optimization, utilization, including fundamentals and application of design tools.
POO 6	apprise international exposure through Conferences, Seminars, Symposiums, Talks, Guest Lectures and visits.
POO 7	perform computational and software skills and usage of latest techniques and software.
POO 8	Justify learnings as future Entrepreneurs and professionals in Design field
POO 9	Decide the importance of disctinct needs and services required for Interior Design students taking environmental concern in focus.

11.6 Mapping of Intended Programme Learning Outcomes to Broad-Based Programme Educational Objectives (PEOs)

The broad-based student learning goals identified in Section I above encompass the intended student learning outcomes as articulated in this section, and are general composites or summaries of these outcomes. These relationships are summarized in the outcomes-to-goals mapping below (Note: $\sqrt{\text{in a}}$ given cell of the table indicates the intended learning outcome in that row is associated with the learning goal in that column.):

PEOs) PLOs	PEO 1	PEO 2	PEO 3	PEO 4	PEO 5	PEO 6	PEO 7	PEO 8	PEO 9	PEO 10

11.7 Student Learning Assessment for BID-MID (Dual)

S.N o	Attributes	Programme Learning Outcomes	Direct	Tool No for Direct Assessment	Target Performa nce	Indirec t	Tool_No for Indirect Assessment	Target Perform ance
1	Knowledge and Expertise in Interior Design	Students shall analyze the major objectives of Interior Design and apply the knowledge of elements of design, graphics construction and services for the solution of complex interior design problems.	Comprehe nsive Exam/ Viva	UG/PLO/ D/CE Framewor k	80% students shall pass the exam.	Alumn i Survey Studen t Exit Survey .	UG PLO/ID/Exi t Survey	80% student's response range between 4-5 on the Likert Scale in the Student Exit Survey.
2	Research and Enquiry	Students shall identify, formulate, research literature based information and analysis of complex design problem reaching to substantial conclusion and application to design.	Dissertatio n and Thesis	UG/PLO/ D/ Dissertatio n and Thesis	80% students will undertak e and complete the dissertati on, Thesis	Feedba ck of Industr y Interns hip Guide Alumn i Survey	UG PLO/ID/Exi t Survey	The Industry Internshi p Guide rates the students between 4-5 range on the Likert Scale in the feedback .

3	Information and digital Literacy	Students shall develop and demonstrate the skill to use various digital mediums to communicate the creative ideas in a planned and timely manner	Comprehe nsive Exam/ Viva	UG/PLO/ D/CE Framewor k	100% students shall able to leverage IT in order to complete their Assignm ents	Studen t Exit Survey	UG PLO/ID/Exi t Survey	student's response range between 4-5 on the Likert Scale in the Student Exit Survey.
4	Problem solving	Students shall execute and apply advanced design software's to provide appropriate, accurate and speedy design solutions	Comprehe nsive Exam	UG/PLO/ D/ CE Framewor k	80% students shall able to demonstr ate Problem Solving and Decision Making Skill	Studen t Exit Survey	UG/PLO/ID /Exit Survey	80% student's response range between 4-5 on the Likert Scale in the Student Exit Survey.
5	Effective Communicat ion	Students shall respond and practice as an individual profession al, as a team member or leader leading teams & also in multidisci plinary disciplines of profession.	CS Rubrics	UG/PLO/ D/CS Rubrics	80% students should secure a grade of 6 and above on a 10-point scale in the presentat ion	Studen t Exit Survey	UG/PLO/ID /Exit Survey	80% student's response range between 4-5 on the Likert Scale in the Student Exit Survey.

6	Behavioral Skills, Teamwork and Leadership	Students shall demonstrate highest of ethical and moral values in their profession.	BS Rubrics	UG/PLO/ D/ BS Rubrics	80% students should secure a grade of 6 and above on a 10- point scale	Studen t Exit Survey	UG/PLO/ID /Exit Survey	student's response range between 4-5 on the Likert Scale in the Student Exit Survey.
7	Global Citizen	Students shall be able to analyze the world economy, market strategies and management principles for growth, executions & integration / utilizations of other disciplines.	FBL Rubrics	UG/PLO/ D/ FBL Rubrics	100% students' participa tion in case studies pertainin g to global issues.	Studen t Exit Survey	UG/PLO/ID /Exit Survey	80% students shall able to demonst rate Global Outlook Perspecti ve.
8	Ethical, Social anf professional understandi ng	Students shall be able to analyze and synthesize the social responsibilities in terms of society, health, safety, security and legal aspects.	Comprehe nsive Exam	UG/PLO/ D/ CE Framewor k	100% students Architect ure Design course and 50% students should secure a grade of 6 and above on a 10-point scale.	Studen t Exit Survey	UG/PLO/Al umni Survey	80% alumni response range between 4-5 on the Likert Scale in the Alumni Survey.
9	Employabilit y, Enterprise & Entrepreneu rship	Students shall demonstrate characteristics of being professional Interior Designers	Comprehe nsive Exam	UG/PLO/ D/ CE Framewor k	80% students should secure a grade of 6 and above on	Studen t Exit Survey Alumn i Survey	UG/PLO/ID /Exit Survey Alumni Survey	80% students response range between 4-5 on the

		through industrial exposure, internship.			a 10-point scale.			Likert Scale in the Student Exit Survey.
10	Lifelong learning	Students shall applyinnovati ve ideas and skills to attract the employer or operate own professional organization. Students shall be able to understand and analyze the need of lifelong learning	Comprehe nsive Exam	UG/PLO/ D/ CE Framewor k	100% students should secure a grade of 6 and above on a 10-point scale.	Alumn i Survey Studen t Exit Survey	UG/PLO/Al umni Survey UG/PLO/10 /Exit Survey	80% alumni response range between 4-5 on the Likert Scale.

SECTION VI
12. 0 Domain Operational Outcomes & Operational Outcome Assessment Plan

12.1 Operational outcomes

In	tended Operational Outcomes for the Faculty of Architecture Planning and Design
1.	The Faculty of APID will use appropriate methodology and pedagogical tools for teaching, learning and development.
2.	The curriculum will be contemporary and relevant to meet industry requirements and benchmarked on global standards by incorporating feedback from all the stakeholders.
3.	The student of APID will graduate in timely manner.
4.	University shall provide Academic facilities, Technological Resources for teaching and learning.
5.	The student of APID will earn achievements in inter-university Extra Curricular activities.
6.	Faculty will be engaged in scholarly and professional activities in order to enhance their competencies and to contribute to the existing Body of Knowledge.
7.	The APID will integrate ethics and values in teaching, theory and practice, develop and retain excellent students, faculty and staff.
8.	APID will facilitate cultivation of cross cultural humanitarian values.
9.	APID will facilitate joint research collaborations; invite international delegates and speakers for seminars and conferences and various other opportunities for global exposure.
10	APID will be continuously engaged in developing/ reviewing processes, policies and systems to achieve prestigious accreditations from various national, international bodies and ranking bodies.
11	APID shall develop and maintain strong relationship with corporate.
12	APID Shall maintain lifelong alumni network and keep the curriculum responsive to industry needs.
13	APID will support all the students for quality placements or join family business or start their own venture.

14.3 Student Alumni Survey- Bachelor & Master Programmes

Dear Alumni, the objective of this Survey is to seek your candid assessment regarding the various learning aspects of the BID/MID/BID +MID (DUAL) Programme. The information from this survey will be analyzed and used to identify the areas of improvement.

Looking back on your time at AMITY, how would you assess each of the following aspects of your at AMITY?

S.No.	Experience	Poor	Fair	Good	Very Good	Excellent
1	Various Courses					
2	Value added courses					
3	Overall academic					
	experience					

1	Non acadamia an							
4	Non-academic or student life							
5	experience Overall experience							
5	Overall experience							
	was your first position a Employed full-time Self-employed Higher studies Unemployed Other	fter leaving the	e Programme:

14.4 Guidelines for Comprehensive Examination

		nes for Comprehensive Examination
Purpose	:	The tests and examinations shall aim at evaluating not only the student's ability to recall
		information, which he had memorized, but also his/her understanding of the subject and
		ability to synthesize scattered bits of information into a meaningful whole.
Goal(s)	:	1. To evaluate the students' ability to recall information.
		2. To assess the knowledge acquired from concepts to design of Architectural
		projects.
		3. To assess the ability to analyze various designing situations/problems in global
		scenario and the execution of designs.
		4. To assess the ability to conduct designing and of course research in the field of
		design.
		5. To assess the designing and reasoning skills, for enhancement of the students'
		imagination.
		6. To assess students' ability for analytical thought process and application in
		present design context
Process:	:	1.A question paper for theory examinations of a course unit of any program will be of 3
		hours duration with maximum marks 70 and will have three sections: Section A, Section
		B and Section C.
		2. (The duration of practical examinations will be as required and value addition courses
		will have different format.
Format	:	1. 3 hours question paper is divided into 3 sections A, B and C.
		Section A: 30 marks (students are advised to devote approximately 1 hour to $1\frac{1}{4}$
		hours out of total three hours on this section).
		In this section, a student is required to answer 5 out of 6 given questions. Each question
		will be of 6 marks. These questions may include short problems or theory questions to
		assess students' understanding of concepts and frameworks.
		and the state of t
		If needed in this section, a question might be designed to have maximum two parts (a)
		and (b) with weightage of 3 marks each to enable testing of concepts and frameworks
		from wider area.
		Topics covered in the question paper depends upon the module given in the syllabus.
		Topies covered in the question paper depends upon the module given in the syndous.
		Topics covered in the question paper depends upon the module given in the syndous.
		Topies covered in the question paper depends upon the module given in the syndous.
		Section B: 20 marks (students are advised to devote approximately 45 minutes to 1
		Section B: 20 marks (students are advised to devote approximately 45 minutes to 1
		Section B: 20 marks (students are advised to devote approximately 45 minutes to 1 hour out of total three hours on this section). In this section, a student is required to answer any two out of three given questions.
		Section B: 20 marks (students are advised to devote approximately 45 minutes to 1 hour out of total three hours on this section). In this section, a student is required to answer any two out of three given questions. Each question will have a weightage of 10 marks and may include long theory questions
		Section B: 20 marks (students are advised to devote approximately 45 minutes to 1 hour out of total three hours on this section). In this section, a student is required to answer any two out of three given questions. Each question will have a weightage of 10 marks and may include long theory questions or numerical problems requiring students to apply the concepts to a given situation or in
		Section B: 20 marks (students are advised to devote approximately 45 minutes to 1 hour out of total three hours on this section). In this section, a student is required to answer any two out of three given questions. Each question will have a weightage of 10 marks and may include long theory questions

If a faculty feels that a questions in this section needs to have sub-parts, there may be maximum two parts provided that part (a) involves understanding of a concept through a numerical or a theory question and part (b) is application of the concept used in part (a).

Topics covered in the question paper depend upon the module given in the syllabus.

Section C: 20 marks (students are advised to devote approximately 45 minutes to 1 hour out of total three hours on this section). Is a Compulsory question.

This section will be compulsory without any choice and will have a weightage of 20 marks. This may be a case study, a hypothetical problem or a situation seeking a possible solution(s), students' response to a situation based on general awareness of the broad discipline of study etc.

Topics covered in the question paper depend upon the module given in the syllabus.

The tests and examinations shall aim at evaluating not only the student's ability to recall information, which he had memorized, but also his understanding of the subject and ability to synthesize scattered bits of information into a meaningful whole. **Some of the questions shall be analytical and invite original thinking or application of theory.**

The paper setters should give wider choice to the students for answering questions, by providing alternate questions in each of the syllabus. The total option in a question paper should not be more than 30% of the total marks assigned to a question paper.

The module no is also specified by the paper setter in the question paper it could be randomly selected but the entire module should be covered in the question paper.

14.5 Format of Comprehensive Examination

Purpose	:	The tests and examinations shall aim at evaluating not only the student's ability to recall information, which he had memorized, but also his/her understanding of the subject and ability to synthesize scattered bits of information into a meaningful whole.
Goal(s)	:	 To evaluate the students' ability to recall information. To assess the knowledge acquired from concepts to design of Architectural projects. To assess the ability to analyze various designing situations/problems in global scenario and the execution of designs. To assess the ability to conduct designing and of course research in the field of design. To assess the designing and reasoning skills, for enhancement of the students' imagination. To assess students' ability for analytical thought process and application in present

	design context
:	1.A question paper for theory examinations of a course unit of any program will be of 3 hours duration with maximum marks 70 and will have three sections: Section A, Section B and Section C.
	2. (The duration of practical examinations will be as required and value addition courses will have different format.
:	2. 3 hours question paper is divided into 3 sections A, B and C. Section A: 30 marks (students are advised to devote approximately 1 hour to 1 ¹ / ₄ hours out of total three hours on this section).
	In this section, a student is required to answer 5 out of 6 given questions. Each question will be of 6 marks. These questions may include short problems or theory questions to assess students' understanding of concepts and frameworks.
	If needed in this section, a question might be designed to have maximum two parts (a) and (b) with weightage of 3 marks each to enable testing of concepts and frameworks from wider area.
	Topics covered in the question paper depends upon the module given in the syllabus.
	Section B: 20 marks (students are advised to devote approximately 45 minutes to 1 hour out of total three hours on this section).
	In this section, a student is required to answer any two out of three given questions. Each question will have a weightage of 10 marks and may include long theory questions or numerical problems requiring students to apply the concepts to a given situation or in a given context.*
	If a faculty feels that a questions in this section needs to have sub-parts, there may be maximum two parts provided that part (a) involves understanding of a concept through a numerical or a theory question and part (b) is application of the concept used in part (a).
	Topics covered in the question paper depend upon the module given in the syllabus. Section C: 20 marks (students are advised to devote approximately 45 minutes to
	1 hour out of total three hours on this section). Is a Compulsory question .
	This section will be compulsory without any choice and will have a weightage of 20 marks. This may be a case study, a hypothetical problem or a situation seeking a possible solution(s), students' response to a situation based on general awareness of

the broad discipline of study etc.

Topics covered in the question paper depend upon the module given in the syllabus.
